Dear Dr. Henney,

I am a citizen and have a right to truthfull information on nutritional supplements. Why has your administration shut down speech on the value of nutritional supplements? You are abridging freedom of speech. Your Food and Drug Administration has rigidly and severly censored it. Why can you under cover of the government break the law and violate others constitutional rights which inturn can damage the lives of all of us.

I as a citizen want the FDA to promptly approve claims for saw palmetto and the symptoms of benign prostatic hyperplasia; psyllium husk seeds and the risk of heart disease; folic acid, vitamin B6 and vitamin B12 and cardiovascular disease; and vitamin E and the risk of cardiovascular disease. I am living specimen of the value of the above and have been taking them for many many years. Even though I am in excellent health for my age the complete physicals keep getting better and better. In fact my last EKG looked better than the years before. You are doing a true injustice to humanity.

I know you are suppose to protect and not harm use which is apparently just what you are doing. Is it the reason that one MD (money doctor) is protecting the others? I will be awaiting your reply.

Sincerely,

Richard C. Zahm

C30
